Copper Finish

We provide Surface finish to our most of Products.

ALL THE SURFACE FINISH PROVIDED TO PROTECT FROM EXTERNAL INFLUENCES.

As being the special part the surface finish of these are very challenging.

Production

Gear is a one of leading manufacture of superior quality washers. We manufacture around 400,000,000 Washers annually among Which many of these are of standard parts. But the proportion of unique dimensions is increasing year after year.

We are well prepared and positioned accordingly having 15,000 square meters of build area.

As with time we have adapt ourselves as usually produce to stock, but not according to order. Which leads the deliver quickly as possible.

Packing

Custom Packing and Designing

Packaging is always an important task for every business. As it is the protector of the product within. It protects the product from physical impacts such as hitting, wetting, and bruising. Packaging allows for the product to reach the consumer in the most economic way possible and creates ease of storage.

Many of our customers are trading companies. There is "packaging" and this is always an issue, as customer-specifically as possible in your own box and the desired quantity.

This desire is what drives us. That is why we have a state-of-the-art packaging machine park. But without a label, there is no salable packaging. In connection with our special label solutions, we implement the desired packaging with a customer-specific label.

The buyer particularly likes this. Because by streamlining the process chain and avoiding multiple packaging processes, the total procurement costs are reduced.

Test Facilities

Inspection of product made is very essential part of business. As it determine the actual evaluation and consideration according to Standard set or to customer requirements.

In GEAR Every product made in checked frequently which ensure us to arise minimal rejection which overall helps to maintain better working environment and benefit in overall.
